LONGEVITY LIFE ACADEMY

The Longevity Masterclass

with Julie Gibson Clark

Second slowest ager in the world, 2023. Structural engineer. Twenty-five years as the scientist and the experiment.

I didn't do this to win.

Running from

Dementia.
Alzheimer's.
Parkinson's.
The silent decade of decline.

Running to

Here for my son, all the days of his life.
Here for grandkids.
Another possibility for how we age.

Ten years pass.
By this test, I age about six.

0.665

Julie's pace of aging. Most people: 1.0.

The speed towards death.

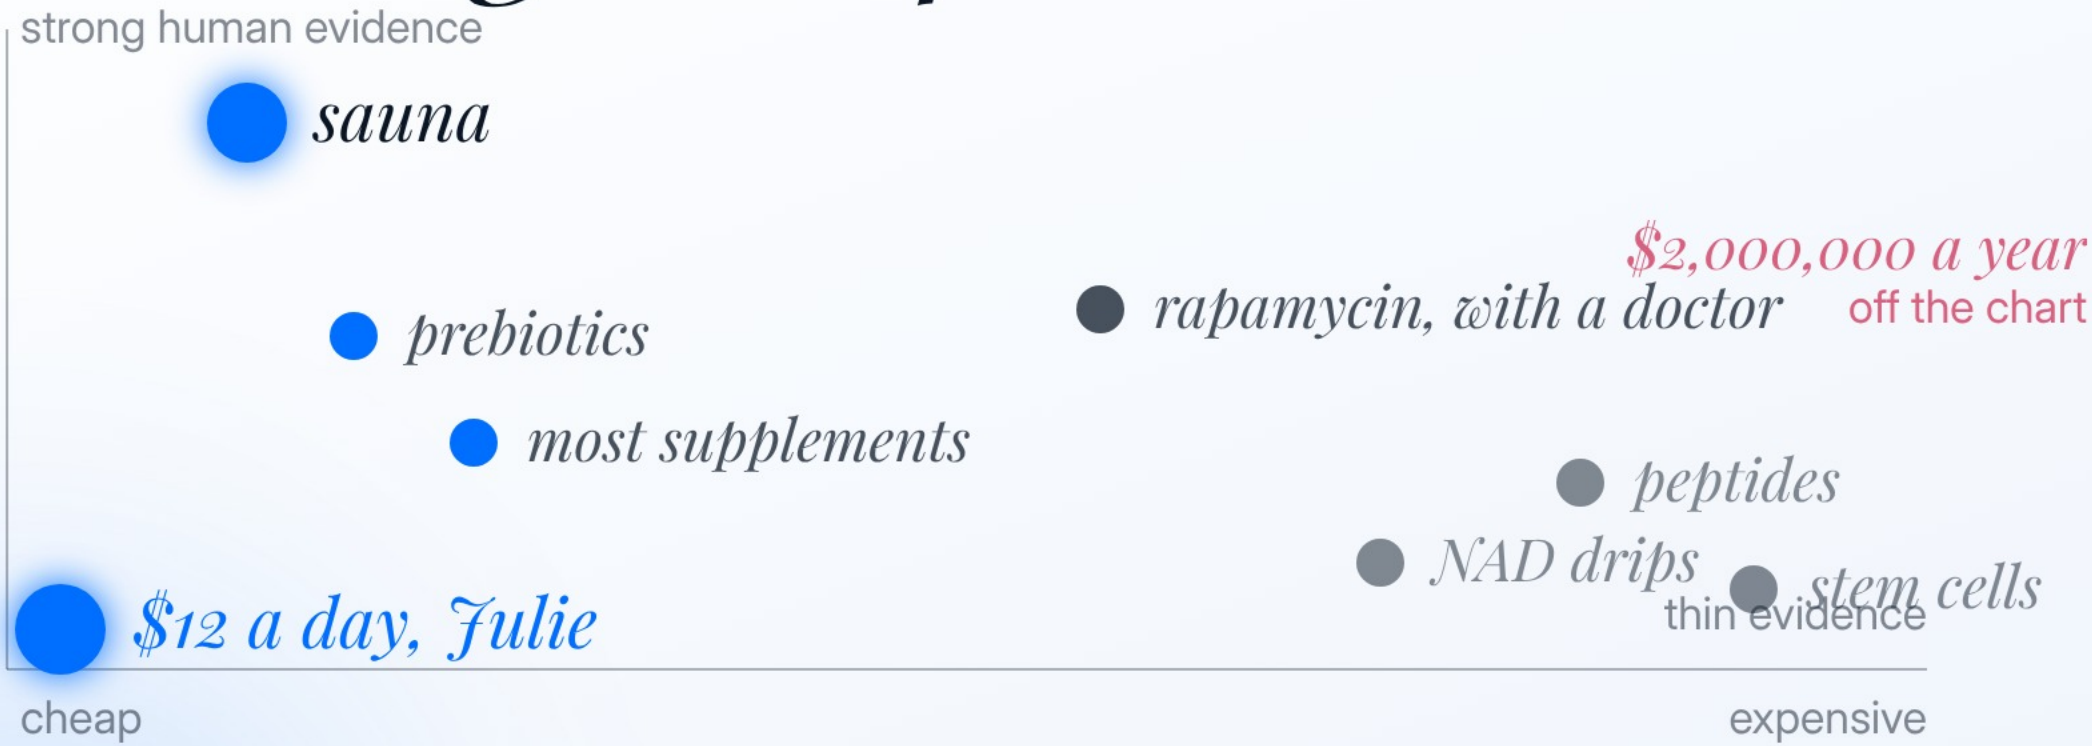

Longevity is like a cake.

Icing	Sauna, peptides, stem cells, light therapies, the gadgets on your feed.
Stress	The layer people skip.
Movement	Four types, four parts of you.
Food	Four pillars, no religion.
Sleep	The repair shift. The bottom of the cake.
Menopause	One thin layer at the base, for half the room.

Nobody has ever eaten a bowl of icing and called it a good cake.

Not wrong. Not first.

The expensive end is not where the evidence is.

Sleep, food, movement and stress do most of the work. Icing on nothing is a bowl of frosting.

the thin layer, at the base

Menopause therapy is a layer, not icing.

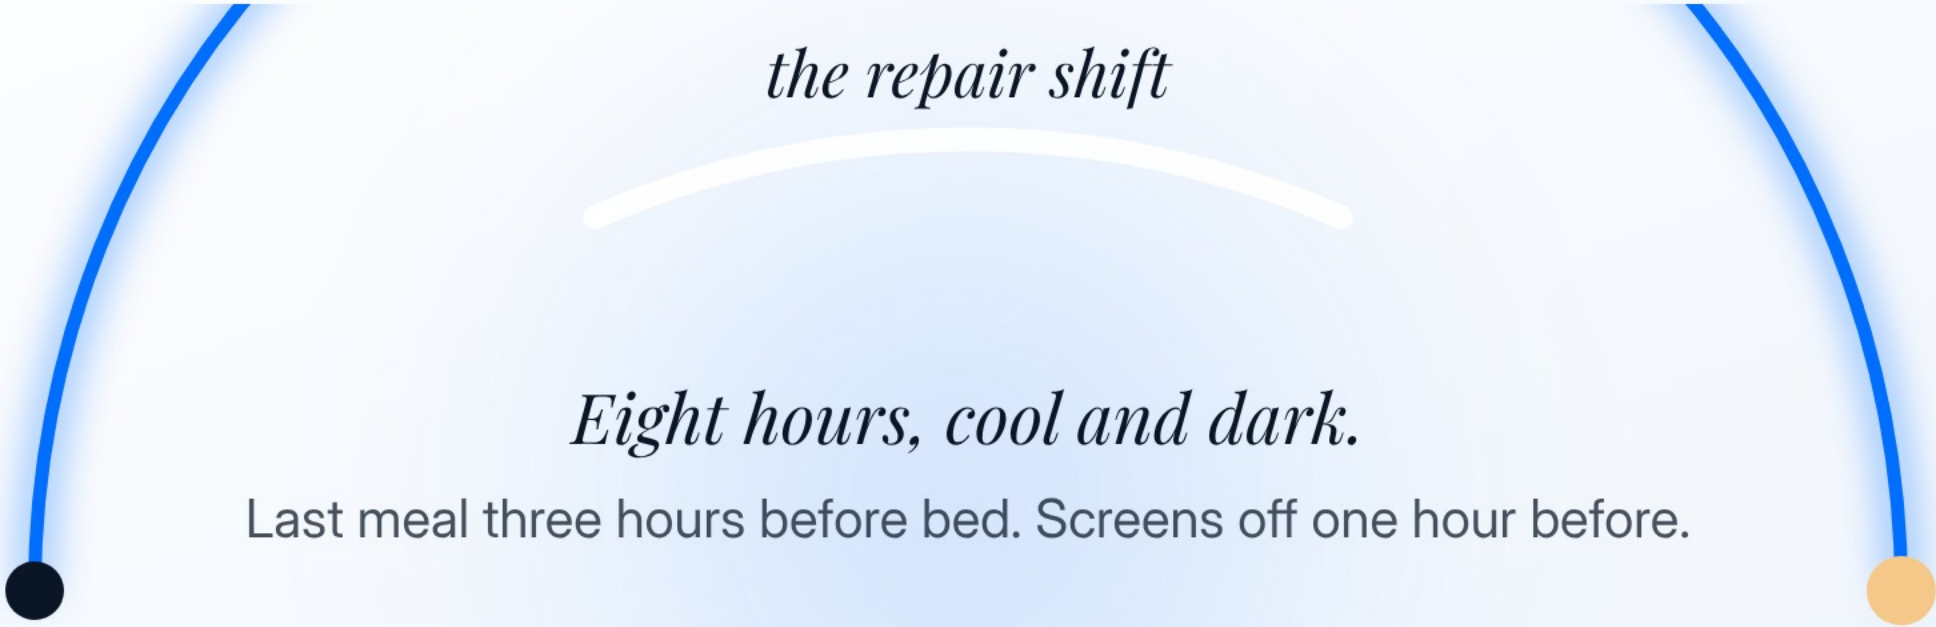

The window

Under sixty, or within ten years: the benefits outweigh the risks. The Menopause Society, 2022. The FDA dropped the black box, 2025.

Find a certified practitioner. The letters are MSCP.

Sleep is the repair shift.

Eight hours, cool and dark.

Last meal three hours before bed. Screens off one hour before.

Lights out 9:00 PM

Up 5:00 AM

Same window, every single night. Regularity beat duration: 48% lower risk of dying.

"I'll sleep when I die,"

said the person aging at twice the normal speed.

Take the religion out of your diet.

~~*vegan*~~ ~~*keto*~~ ~~*Mediterranean*~~ ~~*carnivore*~~

Fiber variety. Protein. Deep color. Real food.

A pound of vegetables a day, half of it greens.
Wild blueberries or pomegranate, every day.
One gram of protein per pound of lean mass.
Eat between 8 AM and 6 PM.

The one thing every doctor agrees on.

Spike.

What a sugary meal does on a glucose monitor.

Signal.

A flood of insulin, locked on high all day.

Scar.

Sugar sticks to your proteins. The crust of a crème brûlée.

25 g of added sugar a day.
That is the ceiling.

Same age.

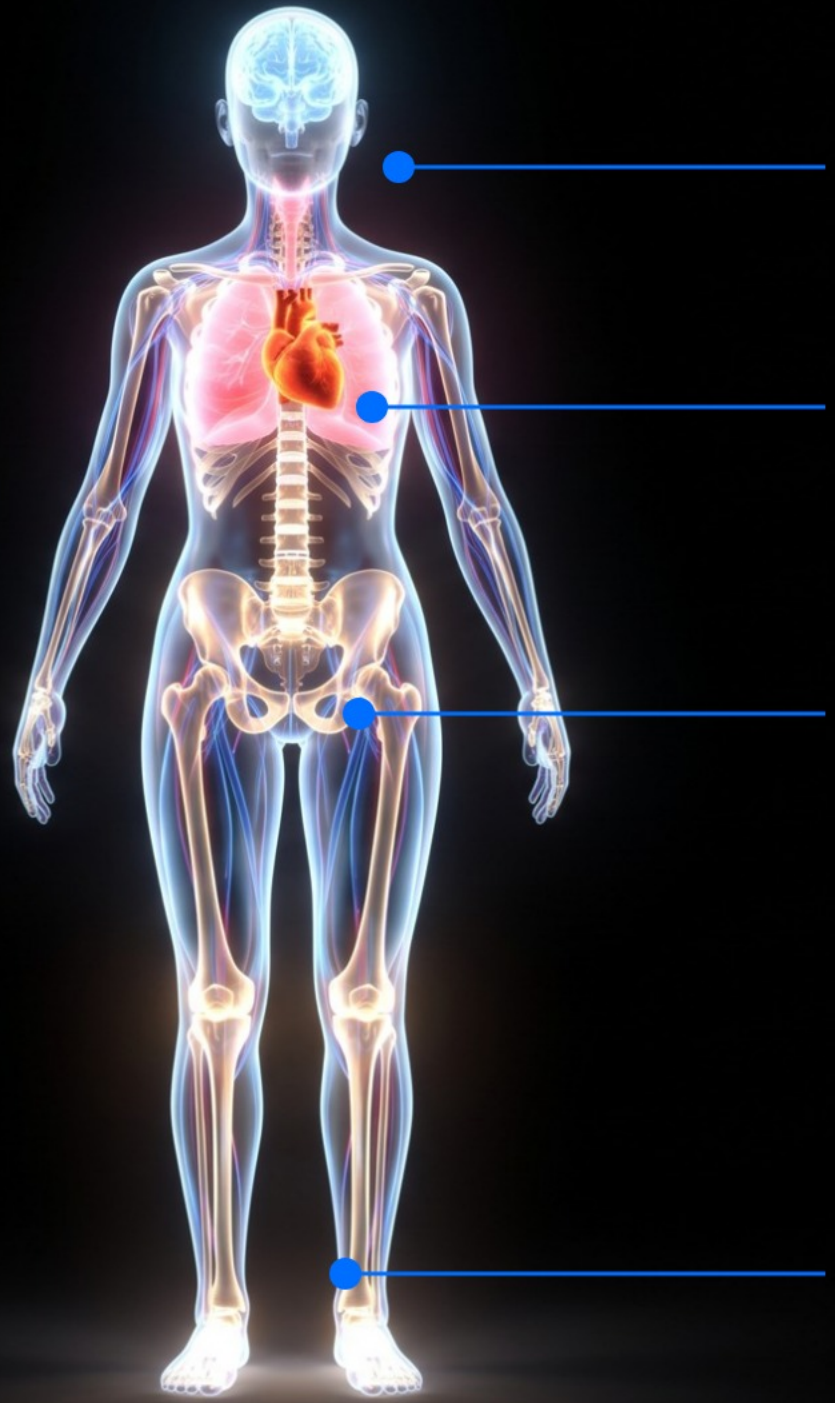

years lived

12.4 years of decline

years lived

years lived well

12.4 years in the United States, the widest gap in the world. The best defense is movement.

Four types of movement, four parts of you.

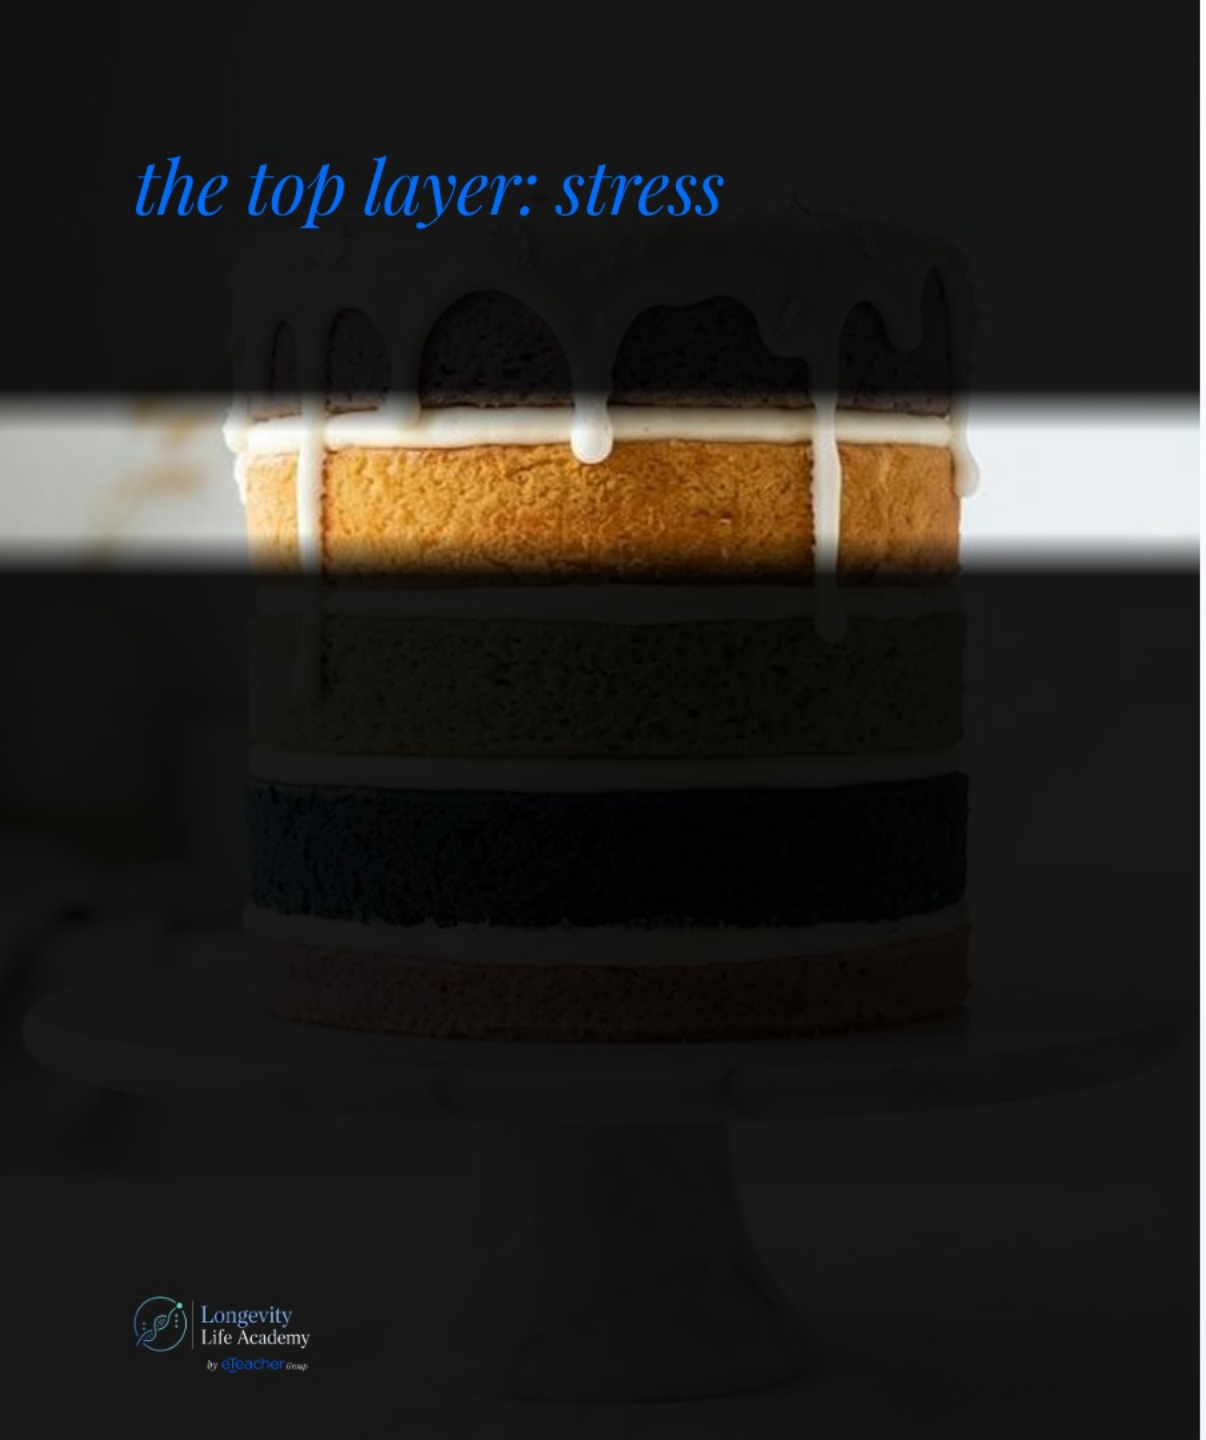

Weights	muscle, bone, brain. The predictor: grip strength.
VO2 max	heart and lungs. The predictor: fitness.
Zone 2	metabolic health, heart. The predictor: 7,000 steps a day.
Balance	brain, and safety for the other three. The predictor: one leg, thirty seconds.

A portfolio, not one stock.

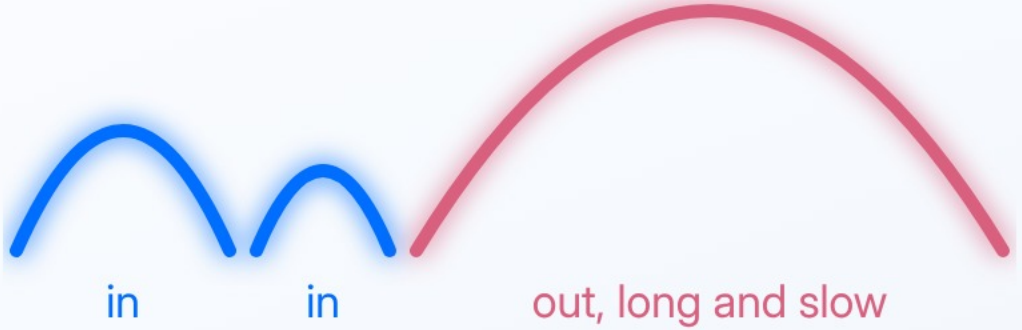

My weekly longevity protocol looks like this.

Mon	Tue	Wed	Thu	Fri	Sat	Sun
Weights then sauna	**Zone 2** a walk	**Weights** then sauna	**VO2 max** short bursts	**Weights** then sauna	**Zone 2** a long hike	**Balance** mobility

Under all seven: 7,000 steps a day, a walk after dinner, one reset.

The layer people skip.

The physiological sigh.

Two short breaths in through the nose, one long breath out through the mouth. Three times.

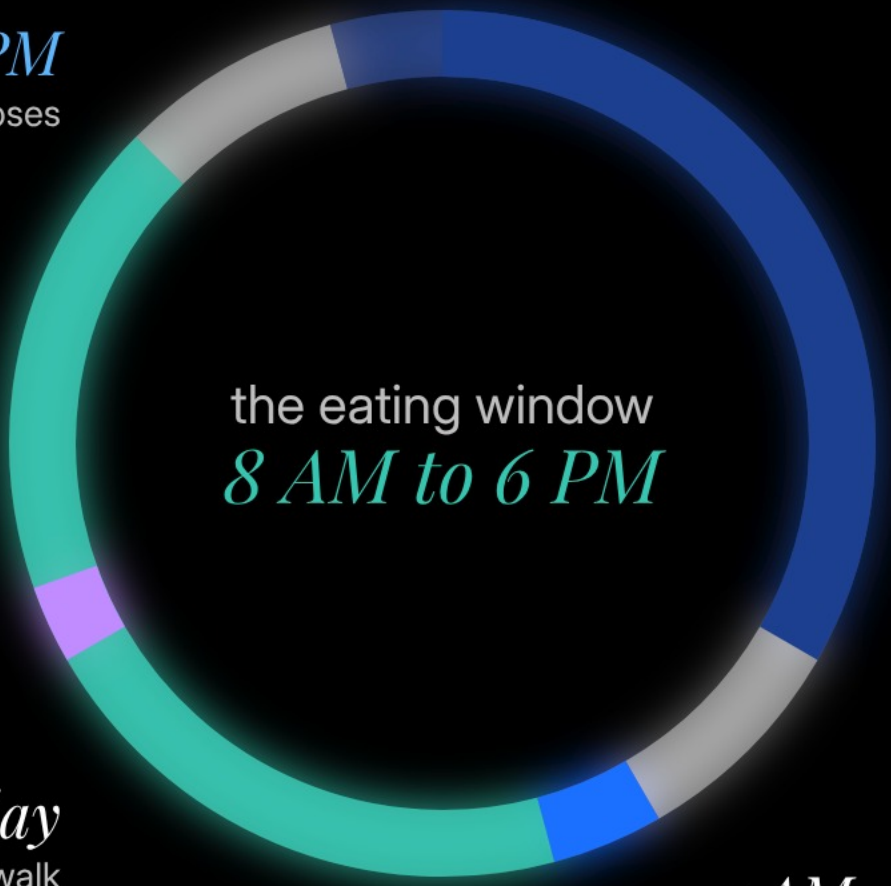

Thirty seconds. Zero dollars. Out of fight or flight.

Julie Gibson Clark's Longevity Protocol.

The day is built backward from bedtime.

- sleep
- food
- movement
- stress

Borrow the order, not the clock.
Screenshot this one.

9 PM
lights out

8 PM
screens off

6 PM
kitchen closes

1 PM
reset

Midday
main meal, a walk

5 AM
wake, water, light

7 AM
training, then sauna

8 AM
window opens, coffee until 9

Longevity Life Academy by eTeacher Group

You don't need a lab.
You need a notebook.

Longevity Life Academy
by eTeacher Group

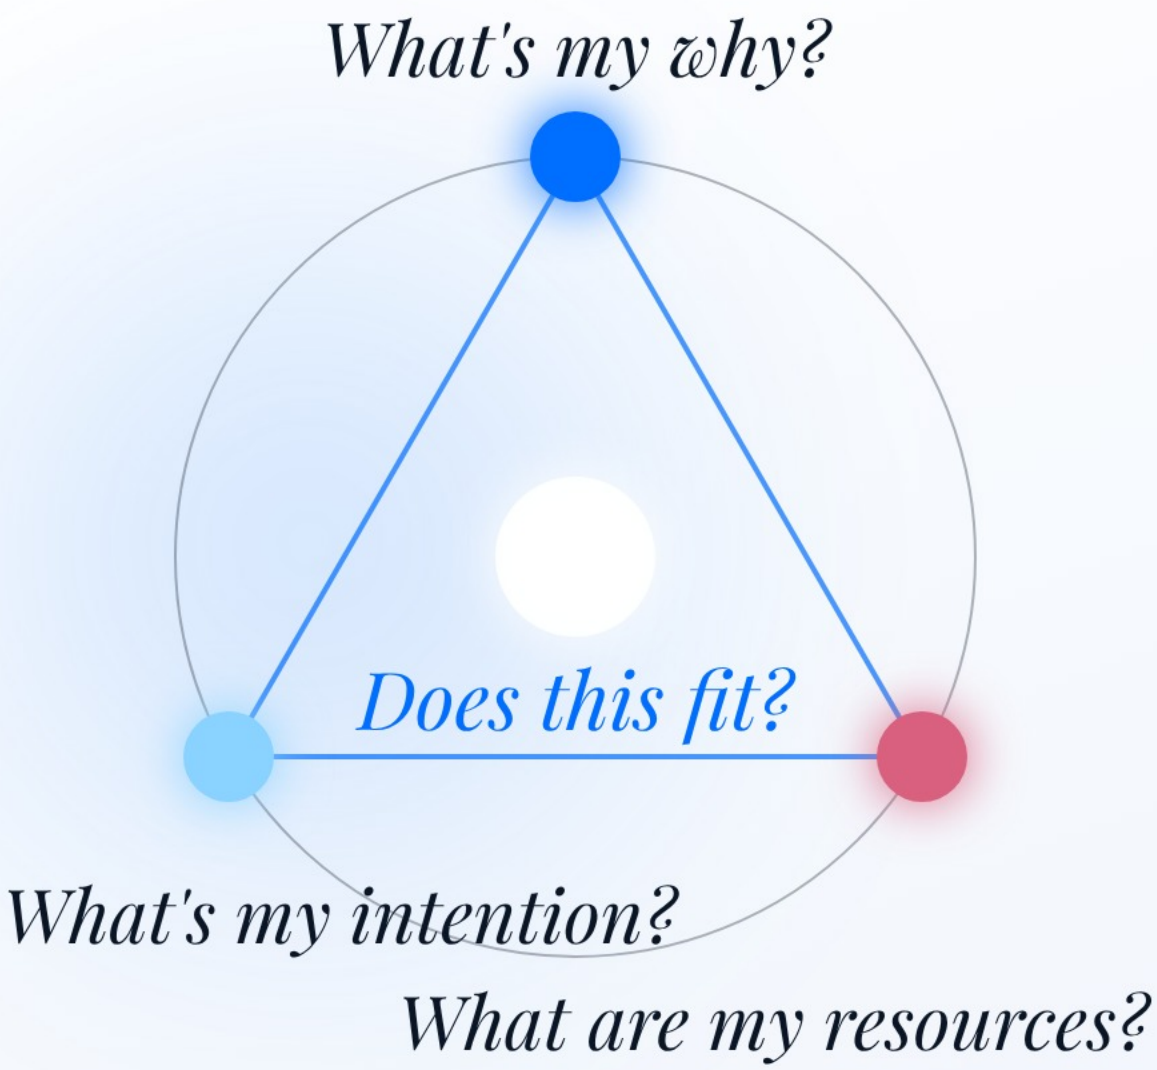

Test. Then buy.

- *Vitamin D*
- *Homocysteine*
- *Inflammation*
- *Micronutrients*

Ask your doctor which of these makes sense for you. Then buy what the hole in the cake needs.

What one person chose

D3 with K2. Magnesium. B-complex. Omega-3s. NOVOS.

Why. Intention. Resources.

Three questions, before anything new goes into your life. When all three are on, the center lights.

The same cake, built week by week, with a teacher.

Your why. Your intention. Your resources. One thing, forty-eight hours.
