LONGEVITY LIFE ACADEMY

The Longevity Masterclass

with Julie Gibson Clark

Second slowest ager in the world, 2023. Structural engineer. Twenty-five years as the scientist and the experiment.

I didn't do this to win.

Running from

Dementia.
Alzheimer's.
Parkinson's.
The silent decade of decline.

Running to

Here for my son, all the days of his life.
Here for grandkids.
Another possibility for how we age.

Ten years pass.
By this test, I age about six.

0.665

Julie's pace of aging. Most people: 1.0.

The speed towards death.

Longevity is like a cake.

Icing	Sauna, peptides, stem cells, light therapies, the gadgets on your feed.
Stress	The layer people skip.
Movement	Four types, four parts of you.
Food	Four pillars, no religion.
Sleep	The repair shift. The bottom of the cake.
Menopause	One thin layer at the base, for half the room.

Nobody has ever eaten a bowl of icing and called it a good cake.

the icing, later

Not wrong. Not first.

First, the cake.

Sleep, food, movement, stress. That is where the work lives.

Then the icing.

Sauna, supplements, peptides, stem cells. Wonderful additions, on top of a cake.

Icing on nothing is a bowl of frosting.

one thin layer, at the base

Menopause therapy is a layer, not icing.

1/2

of this room. It changes sleep, bones, mood and energy, and how well every other layer can work.

Find a doctor with the letters MSCP.

Sleep is the repair shift.

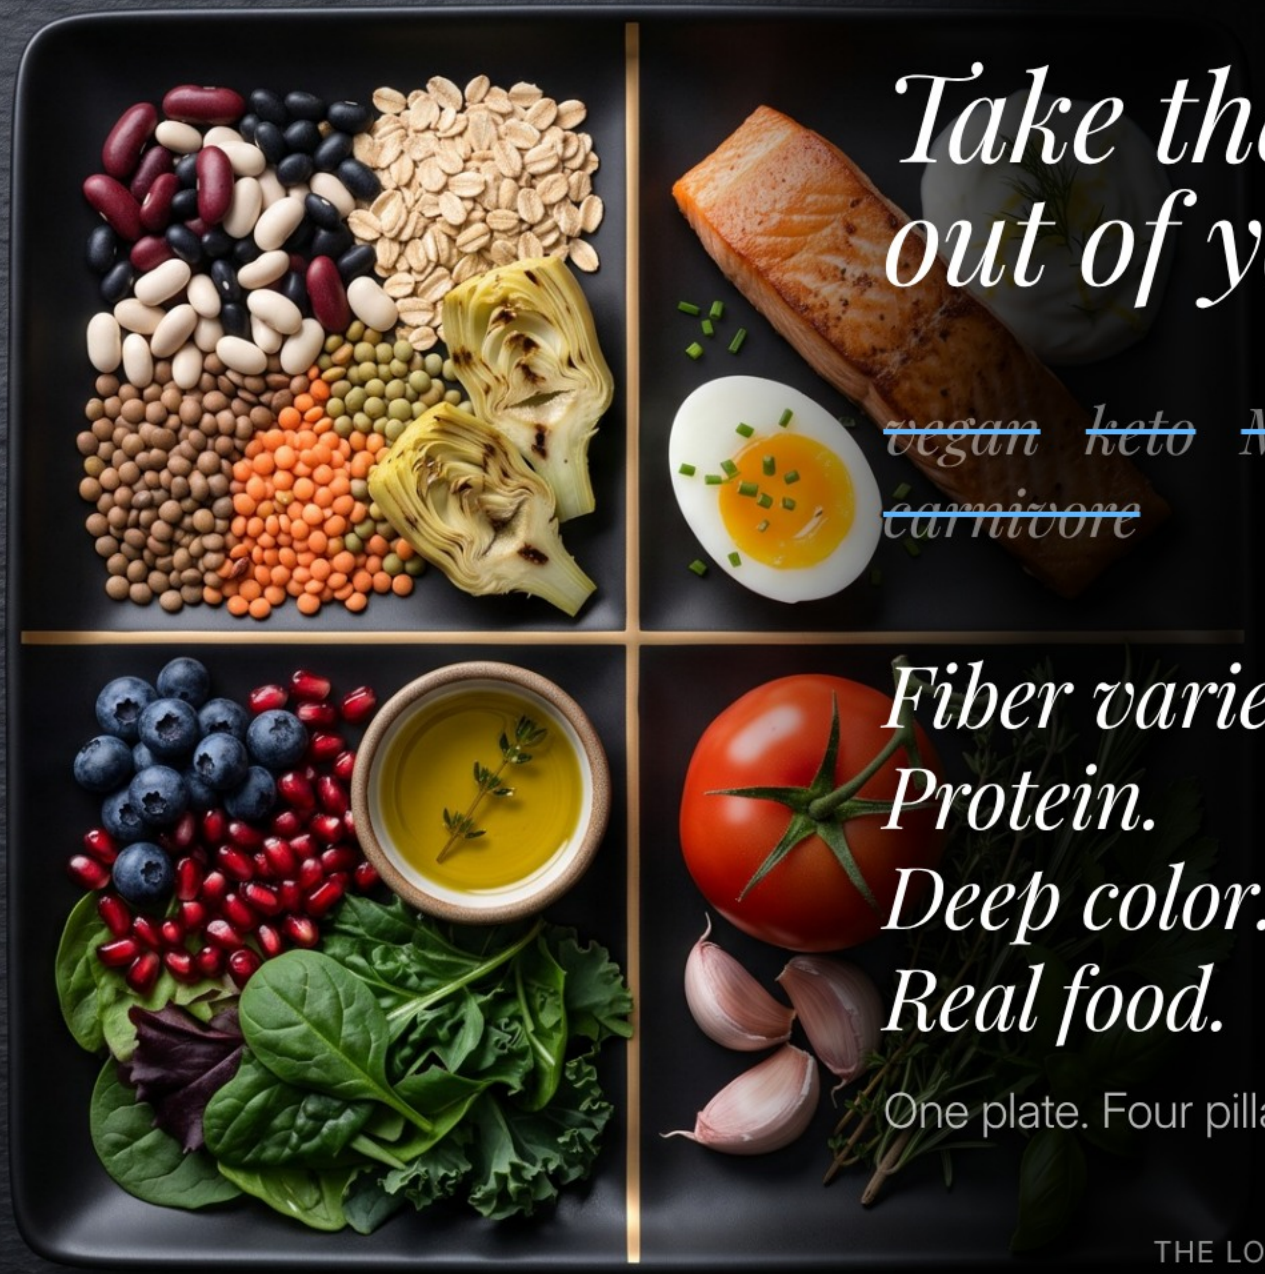

the same window, every night, whether or not you sleep through it

48%

lower risk of dying for the most regular sleepers.
Regularity beat duration. Same bedtime, every single day.

"I'll sleep when I die,"

said the person aging at twice the normal speed.

Take the religion out of your diet.

~~*vegan*~~ ~~*keto*~~ ~~*Mediterranean*~~ ~~*carnivore*~~

Fiber variety.
Protein.
Deep color.
Real food.

One plate. Four pillars. No name.

Longevity Life Academy by eTeacher Group

The one thing every doctor agrees on.

Spike.

What a sugary meal does on a glucose monitor.

Signal.

A flood of insulin, locked on high all day.

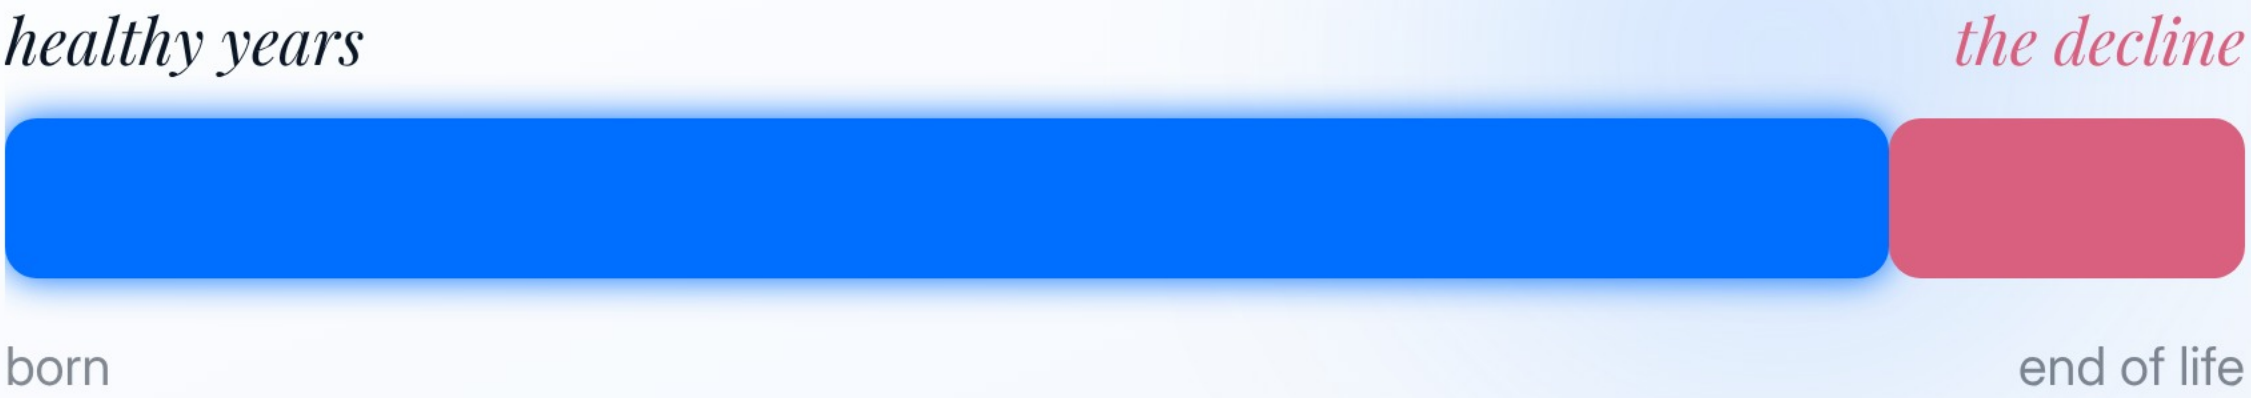

Scar.

Sugar sticks to your proteins. The crust of a crème brûlée.

25 g of added sugar a day.
That is the ceiling.

Same age.

12.4 years, on average, unable to do it alone. The widest gap in the world, in the United States.
The best defense is movement.

Four types of movement, four parts of you.

Weights
muscles, bones, brain

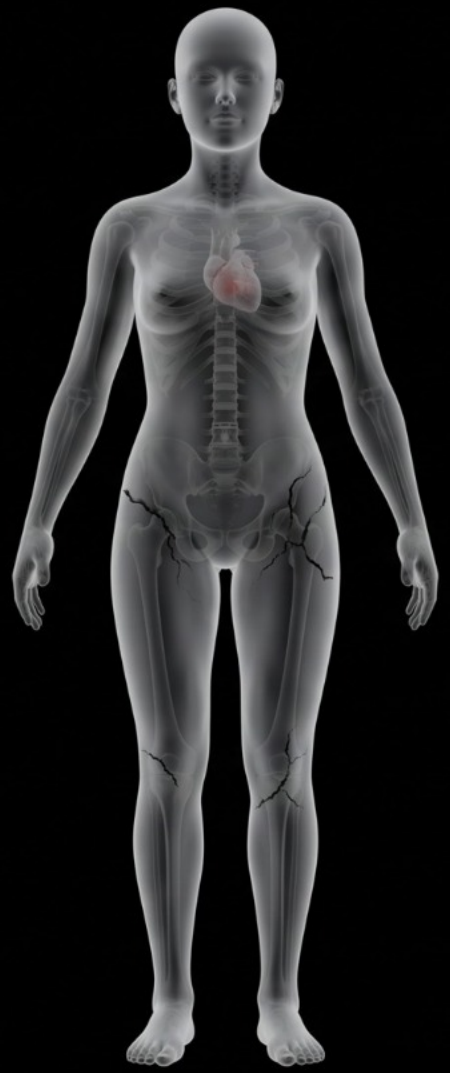

VO2 max
heart and lungs

Zone 2
a walk you can talk through

Balance
the one people forget

Same age. One moves.

7,000 steps
a day: 47% lower risk of dying

Brain
weights, balance

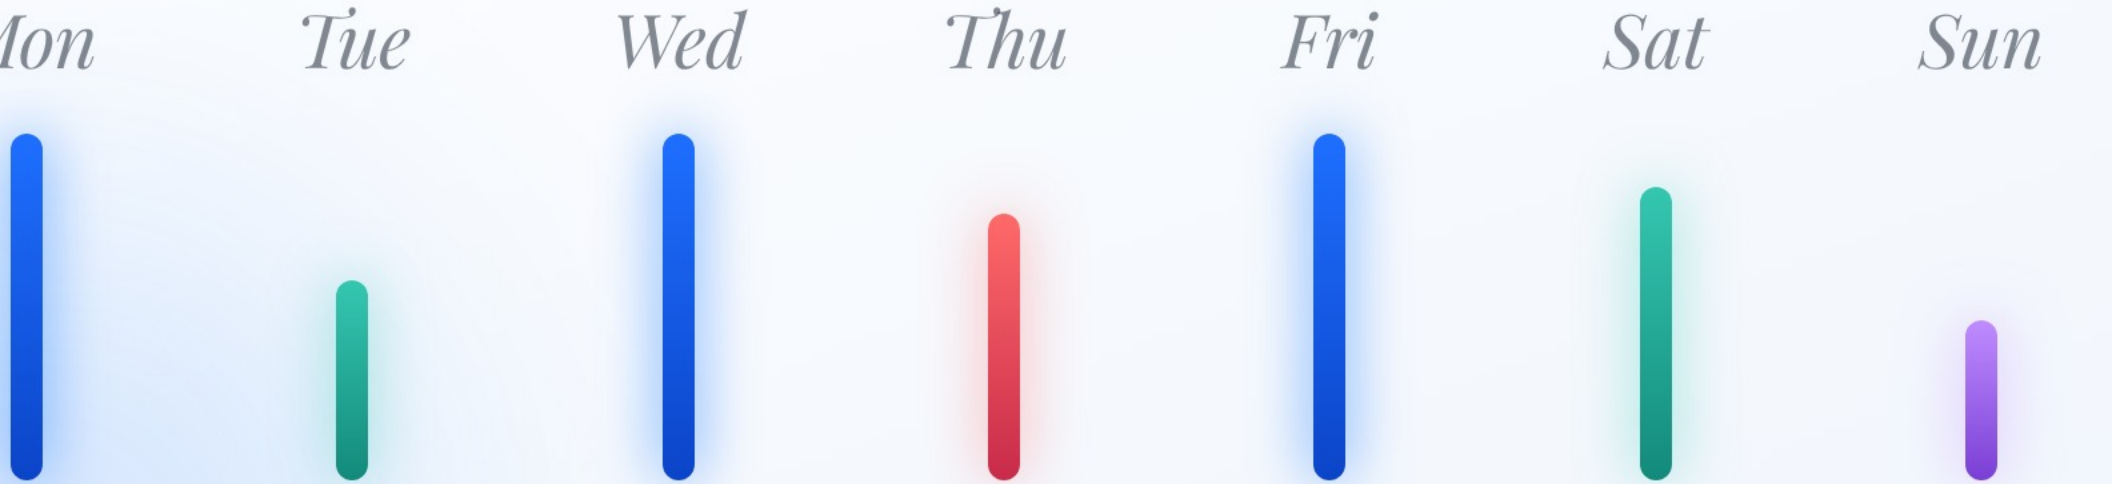

Heart, lungs
VO2 max, zone 2

Muscle, bone
weights

Balance
mobility, one leg, 30 seconds

Longevity Life Academy by eTeacher Group

My weekly longevity protocol looks like this.

Mon	Tue	Wed	Thu	Fri	Sat	Sun
Weights then sauna	**Zone 2** a walk	**Weights** then sauna	**VO2 max** short bursts	**Weights** then sauna	**Zone 2** a long hike	**Balance** mobility

Every day: a walk after dinner, one reset. Start with a walk and a few air squats while the coffee brews.

The layer people skip.

Six months of meditation.
The curve came back.

The free tool: double inhale, one long exhale. Three times. Thirty seconds.

Julie Gibson Clark's Longevity Protocol.

The day is built backward from bedtime.

Lights out at nine sets dinner at six. Borrow the order, not the clock.

5:00
Wake. Water, light.

7:00
Move, then sauna.

8:00
Eat.

9:00
Last coffee.

Midday
Main meal, a walk.

1:00
Reset.

6:00
Kitchen closes.

8:00
Screens off.

9:00
Lights out.

Longevity Life Academy by eTeacher Group

Test. Then buy.

from guessing to seeing

A watch
steps, heart rate, sleep

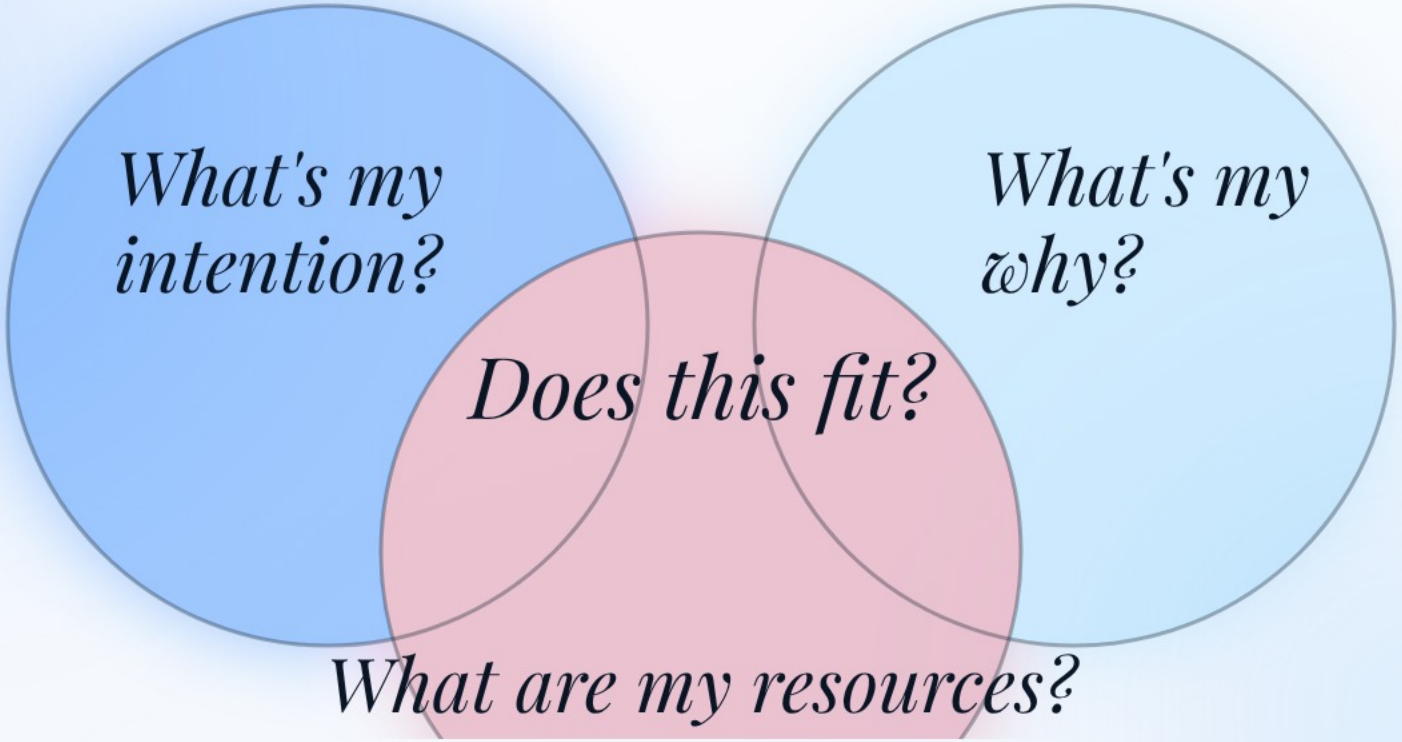

HbA1c
sugar on your proteins

A CGM
what spikes you

A blood panel
vitamin D, inflammation

DunedinPACE
your pace of aging

Why. Intention. Resources.

A sauna session fits. A 9 PM bedtime fits. Not willpower. Three honest questions.
